EDUCATION

MOUNT KENYA UNIVERSITY

- Bachelor of Economics and Statistics

SKILLS

- Data Project Management
- Client Relations
- Collaboration and Teamwork
- Efficient Time Management
- Leadership in Data-Driven Initiatives
- Data Presentation and Communication
- Analytical and Critical Thinking

TONNY NYAIRO

DATA ANALYST | STATISTICAL ANALYST | UI DESIGN

PROFILE

With a background in Economics and Statistics from Mount Kenya University, I have gained experience in Statistical analysis, Data analysis, as well as UI design. Over the years, I have excelled in transforming raw data into user-friendly formats, enhancing clarity and decision-making through intuitive design. My proficiency extends to data collection, processing, and analysis, ensuring the visualizations I create are both accurate and insightful, enabling me to design contextually relevant and effective solutions. My skills complement my expertise in UI design, creating interactive dashboards and visualizations that make data accessible and actionable. In my course of study, I have gained knowledge in:

- Data work - data collection, data processing, visualizations, analysis, and report building.
- Hypothesis testing
- Research
- Statistical analysis
- Micro and macroeconomics.

These have been put into practice as a freelancer and in active employment roles as a data analyst, enabling me to gain advanced skills in:

- Teamwork
- Interactive Design and visualizations
-

WORK EXPERIENCE

Afrexo Global — Strategic Management Department 2024-2026
Strategic Management / Data Analysis

Worked within the Strategic Management Department, applying data analysis, statistical analysis, and forecasting techniques to transform sales and market data into actionable business insights.

Key responsibilities and achievements included:

- Applied data analysis and statistical analysis techniques to evaluate sales performance, identify patterns, and forecast emerging market trends across different regions.
- Analyzed regional sales data to determine high-performing products, customer demand patterns, and product-market opportunities, supporting targeted sales strategies.
- Evaluated sales agent performance to identify top-performing agents, key performance drivers, and areas for improvement, contributing to more effective sales management.
- Conducted trend analysis and forecasting to support stocking and inventory decisions, helping align product availability with regional demand.
- Monitored and analyzed sales performance across regions to support sales tracking, performance evaluation, and strategic decision-making.
- Translated complex sales and market data into actionable insights for management, supporting evidence-based decisions on sales, stocking, market opportunities, and resource allocation.

WORK EXPERIENCE

Freelancer 2021 - PRESENT

Freelance Data Analyst

- Developing and executing comprehensive data analysis projects that align with clients' goals and objectives on gig work sites like Upwork and Freelancer.
- Lead, mentor, and collaborate with clients to deliver high-quality, data-driven insights, fostering a results-driven work environment.
- Ensure consistency and accuracy across all data visualizations and reports delivered to clients.

Market Force 2021 - 2023

Data Analyst

- Assisted in the collection, extraction, cleaning, and preparation of large datasets, ensuring data was accurate, complete, consistent, and ready for analysis and reporting.
- Made use of Microsoft Excel and MS SQL to query, organize, and analyze datasets, identifying trends, patterns, relationships, and anomalies to support business operations.
- Conducted exploratory and descriptive data analysis to generate insights that supported business initiatives and informed evidence-based decision-making.
- Developed and maintained analytical reports and performance metrics, translating raw data into meaningful information for teams and management.
- Created data visualizations, charts, and graphical reports to communicate key trends, patterns, and findings clearly to both technical and non-technical stakeholders.
- Supported the development and improvement of business dashboards, helping track key performance indicators (KPIs) and monitor progress against organizational objectives.
- Collaborated with the data and business teams to validate datasets, investigate discrepancies, and maintain data integrity and accuracy throughout the analysis process.
- Supported the monitoring of business performance metrics, helping teams identify areas of strong performance, emerging trends, and opportunities for improvement.

Cavlor Hydro Ltd —

2026

Data Analyst / Data Management

- Developed a data tracking and reporting tool using Microsoft Power BI and Excel, consolidating project, financial, and operational data into a centralized system for monitoring company performance.
- Designed interactive Power BI dashboards to track key project and financial metrics, providing management with clear, real-time visibility into business performance.
- Monitored and analyzed project expenses, budgets, balances, and financial transactions, supporting improved financial control and resource allocation.
- Created tracking mechanisms for site progress and rate of completion, enabling management to compare actual project progress against planned timelines and identify potential delays.
- Developed Excel-based data structures and reporting templates to organize, validate, and maintain project and financial records accurately.
- Analyzed project expenditure against progress to identify cost trends, variances, and areas requiring management attention.
- Established performance indicators to monitor site completion rates, expenditure levels, outstanding balances, and overall project performance.
- Integrated data from different sources into dashboards and reports, improving data accessibility, consistency, and reporting efficiency.
- Generated periodic reports and visual summaries that transformed complex financial and project data into actionable insights for management decision-making.
- Supported financial and operational planning by providing data-driven insights into project costs, cash utilization, balances, and progress.
- Improved the company's ability to track projects and finances systematically, reducing reliance on fragmented spreadsheets and enabling more informed, data-driven management decisions.
